Note: Please refer to the full user manual for detailed operating instructions for the remote control and control panel.

Let's get started with voice control

No app - no Wi-Fi - no hub required.

The SmartVoice Wall Plug has a built-in microphone for voice commands and an LED light that confirms received commands.

Voice control is ready once the wall plug is plugged into a wall outlet.

Voice control only works on the socket labelled "SmartVoice."

Wake word

The wake word activates voice control:

- "Hey Emerson"

How to use voice control

1. Say the wake word. The wall plug will beep to confirm that voice control is active.
2. After the beep, you have 7 seconds to say a command from the Voice Commands section. After each command, the wall plug will confirm with a voice response and a beep.

Tips:

- After your first command, you can say another command within 7 seconds.
- If more than 7 seconds pass, say the wake word again before your next command.
- If the wall plug does not recognize a command, it will not respond and will continue operating with the current settings.

Voice commands

In this section, you will find:

- Commands you can say (spoken phrases) for certain functions.

Note: The wall plug can only respond to commands listed below.

Power control

Turn ON (after saying the wake word):

- "Turn on"
- "Lights on"
- "Power on"
- "Power up"

Turn OFF (after saying the wake word):

- "Turn off"
- "Lights off"
- "Power off"
- "Power down"

Cancel timers

- "Cancel timer"
- "Cancel sleep"
- "Cancel wake"

Set a timer to turn OFF
